

## **Infinaxis Data Centre and CSF Advisers Sdn Bhd Forge Strategic Partnership to Elevate Cyberjaya’s Digital Connectivity Ecosystem**

**KUALA LUMPUR, 21 NOVEMBER 2024** – Infinaxis Data Centre, an emerging leader in data centre solutions, and CSF Advisers Sdn Bhd, a prominent provider of comprehensive data centre advisory and connectivity solutions, are pleased to announce a strategic collaboration to bolster connectivity offerings between their data centres in Cyberjaya, Malaysia. This partnership aims to harness the strengths of both organizations, driving innovation, reliability, and scalable solutions in the evolving digital infrastructure landscape of Southeast Asia.

By combining the cutting-edge capabilities of Infinaxis Data Centre located within Cyberjaya’s growing technology hub with the unparalleled managed connectivity expertise of CSF Advisers, this collaboration is set to redefine connectivity standards in the region. The partnership will support high-speed, low-latency network solutions tailored to meet the demands of modern enterprises, cloud service providers, and a wide range of industries operating within and beyond Malaysia.

“Our partnership with CSF Advisers is an essential step towards ensuring seamless connectivity solutions for our clients,” stated Zahri Mirza, CEO of Infinaxis Data Centre. “With Infinaxis’ state-of-the-art facilities and CSF’s vast experience in building robust network ecosystems, we aim to empower Cyberjaya’s digital community by providing scalable, resilient, and ultra-reliable connectivity solutions.”

Billy Lee Kok Chi, Chairman of CSF Advisers Sdn Bhd added, “This collaboration underscores our commitment to transforming Cyberjaya into a top-tier digital hub, recognized across Southeast Asia and beyond. By leveraging CSF’s deep expertise in managing and operating extensive data centre facilities, alongside our comprehensive connectivity solutions - ranging from dark fibre and subsea cable access to dedicated data centre space - we are proud to offer businesses unparalleled opportunities to scale and thrive.”

### **Key Features and Benefits of the Partnership:**

- ❖ **Robust, Low-Latency Connectivity:**
  - Optimized to meet the demands of enterprises, cloud services, and content providers.
- ❖ **Enhanced Capacity and Resilience:**
  - Providing redundancy and scalable solutions designed to minimize downtime and maximize performance.
- ❖ **Extensive Access to Major Connectivity Hubs:**
  - Leveraging CSF Advisers’ established partnerships with Malaysia’s largest Internet Exchanges, including MYIX, DE-CIX, and the largest dark fibre DC, TelcoHub1 in Malaysia.

- ❖ 12MW High-Performance Data Centre Facility:
  - The facility, with an initial 6MW Ready for Service (RFS) by June 2025, is designed for high performance with an efficient target Power Usage Effectiveness (PUE)  $\leq 1.4$ .
- ❖ Scalable Rack Deployment:
  - Supports approximately 1,300+ standard cabinets across 9 data centre halls, offering ample space and flexibility for enterprise and hyperscale needs.
- ❖ High Power Density and Liquid Cooling Options:
  - Engineered for high-density deployments, with racks supporting 9kW to 16kW and the capability of liquid cooling to accommodate loads above 16kW per rack, ideal for high-performance and AI applications.
- ❖ Floor Loading Capacity:
  - Designed with floor loading support up to 20kN/m<sup>2</sup> in no-raise-floor data centre halls, ensuring structural integrity for heavy equipment.

Together, Infinaxis Data Centre and CSF Advisers aim to position Cyberjaya as a prime destination for organizations seeking reliable data centre services with advanced connectivity options, fostering growth and innovation in Cyberjaya's data centre ecosystem.

### **About Infinaxis Data Centre Holdings**

Infinaxis is a data centre developer and operator and positioned to build a Data Centre platform in Southeast Asia. The team has deep DC knowledge with extensive experience in execution across the entire data centre life cycle of investment, site acquisition, financing, development, operations and divestment. Headquartered in Singapore, Infinaxis is uniquely positioned to tap the growing demand for digital infrastructure and services in the region.

Infinaxis Data Centre offers high-performance data centre solutions designed to support the needs of modern enterprises, with a focus on scalability, reliability, and innovation.

### **About CSF Advisers Sdn Bhd**

CSF Advisers has earned a leading reputation for providing a full suite of data centre services, including co-location, managed services, and access to a broad network of connectivity options such as dark fiber and subsea cables. Managing over 1 million square feet of white space including Malaysia largest dark fibre data centre TelcoHub1, CSF serves a diverse client base, including government-linked organizations, financial institutions, telecommunications firms, and some of the world's largest content providers.
